

School Centred Initial Teacher Training

As a School-Centred Initial Teacher Training (SCITT) hub, Oundle runs two successful training schemes in the shortage subjects of Maths, Physics and Modern Languages.

Do you have a good degree in a related subject area?
Whether you are a recent graduate or someone
looking to change career, our subject-specific SCITTs
could be your step on the path to an enormously
rewarding career.

Our subject-specific SCITTs are different from the traditional PGCE route. Trainees spend more time working in schools from the start and study the educational theory (the PGCE part) alongside teaching in the classroom. We offer:

- Weekly or fortnightly subject-specific training throughout the course from subject specialists at Oundle School
- The opportunity to build up your teaching very gradually
- Placement at two of our thirty partner schools in the area, enabling you to experience teaching in both independent and maintained sectors.

Each trainee has an in-school mentor to guide and support them throughout the year. The PGCE is provided by Buckingham University online.

Trainees attend 11 training days across the year at Oundle School, which are delivered by experienced language teachers and PGCE tutors. The PGCE part of the course is provided by Sheffield Hallam University and takes a blended approach.

1 year (full-time) or 2 years (part-time) course

Expressions of interest must be received before the end of May.

The School is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment. You will be required to undergo child protection screening appropriate to the post including checks with past employers and the Disclosure and Barring Service.
